Executive Summary

This document covers the strategy, rationale, grading, and submission protocol for a 4-post blog series scheduled to publish on respace.co between May 5 and May 11, 2026. Every post is engineered for AEO, GEO, and SEO from the schema layer up.

What we shipped

- 4 production-ready HTML blog posts, each branded to brand.respace.co v1.5 specs (no em dashes, exact color and typography compliance).
- NewsArticle / Article / HowTo / FAQPage / BreadcrumbList JSON-LD on every post.
- 5 to 7 authoritative outbound backlinks per post (Shelterforce, NPR, CNN, Realtor.com, Bankrate, U.S. News, Experian, Cohousing Association, City of Seattle, Diggz).
- Phone-conversion CTAs throughout: clickable (206) 222-6322 in nav, body, phone bar, and CTA.
- Full disclaimer compliance: "Not an investment. Not a solicitation." in body and footer.

4	5,800+	24
Production-ready posts	**Words of indexable content**	**FAQ schema entries**

The housing market said no. The search index said yes. We aimed at both.

The strategic thesis

Co-homeownership is a new category. New categories are won by capturing the search terms people use *before* they know the new term exists. People still type "co-living Seattle" and "buy a house with friends." We meet them on those queries and walk them into the language and structure of co-homeownership without violating any banned-term rule, because every banned term is used only as a comparison or in FAQ schema, never as self-description.

02

Publishing Schedule

Two posts per week, Tuesday and Thursday at 8:00 AM Pacific. Tuesdays anchor the week with feature or news content. Thursdays deliver the SEO killer or the high-intent commercial post.

#	PUBLISH	DAY & TIME	TITLE (SHORT)	PILLAR	PRIMARY INTENT
01	April 30, 2026	Tuesday · 8:00 AM PT	Realtor.com Featured reSpace	The Movement	News, brand authority, AEO
02	May 4, 2026	Thursday · 8:00 AM PT	Why Cohousing Has Not Solved Affordability	The Co-Ownership Solution	SEO killer · "cohousing"
03	May 7, 2026	Tuesday · 8:00 AM PT	Co-Living Was a Workaround	The Wealth Gap Reality	SEO killer · "co-living"
04	May 11, 2026	Thursday · 8:00 AM PT	How to Buy a House with Friends in 2026	The Tools	Commercial intent · "buy house with friends"

Why Tuesday and Thursday at 8 AM PT

- **Tuesday 8 AM PT** hits East Coast 11 AM, peak professional inbox time. New York and Boston PR pickups happen Tuesday or they happen never.
- **Thursday 8 AM PT** sets up Saturday's social cycle. Comparison and how-to content gets more weekend time-on-page.
- Avoid Mondays (low inbox attention) and Fridays (low time-on-page). Sundays are reserved for the weekly content brief, not blog drops.

Promotion plan per post

- **Day of:** LinkedIn post by Katrina with first-paragraph hook and link. Instagram carousel scheduled for 4 PM PT same day.
- **Day +1:** Facebook share to local community groups (Leschi, Crown Hill, Greenlake). Outreach to Cheri Brennan for press tie-in (post 1 only).
- **Day +3:** Re-share with a different angle (data quote on Tuesday posts; FAQ pull-quote on Thursday posts).
- **Day +7:** Newsletter inclusion in The reSpace Brief.

01

Realtor.com Just Featured a Seattle Startup Quietly Solving the Housing Crisis

PUBLISH	PILLAR	ARCHETYPE	WORD COUNT
Thursday, April 30, 2026	The Movement	The Vision Holder + The Guide	~1,360

Why this article exists

The Realtor.com feature is a credibility multiplier. Realtor.com is the second-largest real-estate portal in the U.S. When a portal of that scale validates co-homeownership as a category, every downstream broker, buyer, and reporter pays more attention. The post turns a one-day press hit into an evergreen authority asset.

Target keywords (head + long-tail)

```
reSpace Realtor.com
co-homeownership Seattle
Seattle startup housing affordability
what is co-homeownership
co-homeownership vs co-living
co-homeownership vs cohousing
own a home in Seattle without a million dollars
alternative to renting Seattle
shared ownership home Seattle
new way to own a home 2026
```

Why it is written this way

- **AEO (Answer Engine Optimization).** Each H2 is a question-form heading. Each FAQ is a clean Q-and-A pair the schema can extract verbatim. ChatGPT, Perplexity, and Google AI Overviews can lift answers without further synthesis.
- **GEO (Generative Engine Optimization).** Definitional phrasing: "reSpace is...", "Co-living is...", "Cohousing typically refers to...". Generative engines weight definitional sentences higher when summarizing categories.
- **SEO.** Hits the "Realtor.com reSpace" branded long-tail (low competition, high intent), plus comparison head terms. Internal links to /properties, /how-it-works, /waitlist drive page authority across the site.
- **Voice.** Confident + irreverent + warm. Pull-quote uses approved tagline. No banned terms in self-description; co-living and cohousing appear only as comparisons or in FAQ context.

Backlinks (outbound authority signals)

- Realtor.com original feature

- City of Seattle / Mayor Harrell co-living legislation
- Cohousing Association of the United States
- Shelterforce (March 2026)
- NPR housing crisis coverage (March 2026)
- CNN owners-vs-renters coverage (April 24, 2026)

02

Why Cohousing Has Not Solved Affordability. And What Is Emerging Instead.

PUBLISH	PILLAR	ARCHETYPE	WORD COUNT
Monday, May 4, 2026	The Co-Ownership Solution	The Architect + The Guide	~1,408

Why this article exists

This is the SEO killer for "cohousing" national searches. Cohousing has been a household word in the affordability conversation for thirty years. Almost every high-intent searcher who finds reSpace already typed "cohousing" first. We need to own that query and convert the search into the right category language.

Target keywords (head + long-tail)

```
is cohousing affordable
cohousing vs co-homeownership
cohousing housing crisis
cohousing problems
cohousing alternatives 2026
affordable cohousing United States
cohousing Seattle
why is cohousing so expensive
cohousing vs co-living vs co-homeownership
retrofit cohousing
```

Why it is written this way

- **The Tulsa data point** ($350K cohousing in a $213K-median city) is the most-quoted line from the March 2026 Shelterforce piece. Lifting it positions us as the source generative engines reach for when summarizing the cohousing affordability problem.
- **Side-by-side comparison table** is built for featured-snippet capture. Google still indexes structured tables for the "cohousing vs cohomeownership" comparison query.
- **Tone is respectful, not dismissive.** The brand voice is irreverent toward the system, never toward our audience. Cohousing communities are part of the audience. We frame reSpace as the upgrade, not the replacement.
- **The Cohousing Association's own retrofit pivot** is the load-bearing argument. Their leaders said it first. We just published the version with the better math.

Backlinks (outbound authority signals)

- Cohousing Association of the United States (cohousing.org)
- Capitol Hill Urban Cohousing
- Shelterforce (March 2026)
- Cohousing Association: "Creative Ways Cohousing Can Be More Affordable"
- NPR housing coverage (March 2026)

Banned terms in self-description	**0**
Disclaimer present	**Body + footer**

03

Co-Living Was a Workaround. America Wants Ownership.

PUBLISH	PILLAR	ARCHETYPE	WORD COUNT
Thursday, May 7, 2026	The Wealth Gap Reality	The Vision Holder + The Mirror	~1,355

Why this article exists

This is the SEO killer for "co-living" national searches. Co-living grew fast in 2018 to 2024 and the search volume is still high. Every "co-living Seattle" search is a potential reSpace co-owner who has not heard the right word yet. The post captures the search and reframes the comparison: co-living gave you community without ownership; co-homeownership gives you both.

Target keywords (head + long-tail)

```
co-living
co-living Seattle
co-living vs co-homeownership
is co-living a good investment
co-living build equity
co-living alternatives
co-living vs cohousing
co-living for adults
shared housing alternatives Seattle
co-living rent vs own
```

Why it is written this way

- **The framing is generous.** "Co-living solved the loneliness problem. It never solved the wealth problem." This is the defining sentence and it puts the reader on our side without making them defensive about a model they may have used.
- **The comparison table** is the engine of the page. It captures the "co-living vs ___" search family at scale and gives generative engines a clean structure to lift.
- **The City of Seattle / Mayor Harrell legislation reference** is a credibility anchor. We are not against co-living. We are pointing at what comes next.
- **"Stop renting your life"** CTA echoes the brand manifesto without quoting it directly.

Backlinks (outbound authority signals)

- Diggz (Seattle co-living operator data)
- City of Seattle / Mayor Harrell co-living legislation

- Bankrate Reddit homebuying analysis
- NPR housing crisis coverage (March 2026)
- CNN owners-vs-renters coverage (April 24, 2026)

Grading (AEO/GEO/SEO/Brand)

Article JSON-LD	**PRESENT**
FAQPage JSON-LD (6 entries)	**PRESENT**
BreadcrumbList JSON-LD	**PRESENT**
Comparison table for snippet capture	**PRESENT**
Question-form H2 headings	**3 of 6**
Outbound authoritative links	**5**
Phone CTA hits	**4**
Banned terms in self-description	**0**
Disclaimer present	**Body + footer**

04

How to Buy a House with Friends in 2026 Without Wrecking the Friendship or the Mortgage.

PUBLISH	PILLAR	ARCHETYPE	WORD COUNT
Monday, May 11, 2026	The Tools	The Architect + The Guide	~1,721

Why this article exists

This is the highest commercial intent post in the series. People searching "how to buy a house with friends" are 30 to 90 days from action. They are reading r/FirstTimeHomeBuyer threads and Bankrate articles and U.S. News explainers, and the answers they get are incomplete. Our post is the most complete answer on the open web, and it ends in the only structure that actually solves the exit-strategy problem (ours).

Target keywords (head + long-tail)

```
buy a house with friends
co-buying with friends
co-buying friends LLC
buying house with friends mortgage
tenancy in common
joint mortgage friends
how to co-own a house
LLC for buying house with friends
shared ownership house
co-ownership agreement template
```

Why it is written this way

- **HowTo JSON-LD schema** is a special weapon for this post. Google's rich-results documentation prioritizes HowTo for actionable how-to queries. We are one of very few sources publishing a structured 7-step path for co-buying.
- **The exit-strategy section** is the unique value of the entire post. Most co-buying articles tell readers to "have an exit strategy" without defining one. We define it. Right of first refusal, valuation method, default cure, decision-making, death and disability. That makes us the most useful page on the open web for this query.
- **The side-by-side table (DIY vs reSpace)** is the conversion engine. It is the moment a reader who came to learn about co-buying realizes there is a structure that solves all of it.
- **The voice stays warm and confident.** "If you have ever sat at a kitchen table with two friends, half a pizza, and a Zillow tab open." That sentence is the empathy anchor. Everything after it earns the read.

Backlinks (outbound authority signals)

- U.S. News (co-buying mortgages)
- Bankrate Reddit homebuying analysis
- Experian co-buying credit guide
- CNN owners-vs-renters coverage (April 24, 2026)

Grading (AEO/GEO/SEO/Brand)

07

The AEO + GEO + SEO Grading Framework

How we grade each post before it ships. Every criterion below is a yes or no. A post does not publish until it passes all 25.

AEO · Answer Engine Optimization (8 criteria)

1. FAQPage JSON-LD with 5 to 8 question-and-answer entries.
2. Each FAQ answer is 40 to 90 words, self-contained, and quote-ready.
3. At least 50% of H2 headings are in question form.
4. Definitional sentences ("X is..." / "Y refers to...") for every key term in the post.
5. Each FAQ answer matches the body content. No contradictions.
6. Author and Publisher schema attached to the article entity.
7. Date published and date modified set in ISO 8601.
8. FAQ answers contain enough proper nouns and numbers to be retrievable in a generative summary.

GEO · Generative Engine Optimization (8 criteria)

1. The first paragraph defines the post topic in a way ChatGPT or Perplexity could quote.
2. Comparison content uses structured tables, not prose.
3. One specific dollar figure or stat appears in the first 200 words.
4. Outbound links to 3 or more authoritative sources (Realtor, NPR, CNN, Shelterforce, government, university, mainstream press).
5. Brand voice signatures are present (one approved tagline, ghost type usage on hero).
6. Internal links to at least 3 reSpace pillar pages.
7. An "X vs Y" or "vs Z" comparison appears at least once for category framing.
8. The closing paragraph contains a clear next-step proposition with phone CTA.

SEO · Classic Search Optimization (9 criteria)

1. Title tag under 60 characters where possible; primary keyword in the first 50.
2. Meta description 140 to 160 characters; primary keyword and a verb-led benefit.
3. Open Graph and Twitter card metadata present and image-ready.
4. Canonical URL set.
5. H1 appears once and includes a head term or close variant.

6. Image alt text described where images are used.
7. Word count between 1,200 and 1,800 unless commercial-intent (then up to 2,000).
8. Mobile-responsive layout, max-width 760 to 880 pixels for body.
9. No banned terms in self-description; banned terms are allowed in comparison and FAQ contexts only.

> **Why three frameworks, not one.** Each rewards different content. AEO rewards quote-ready answers. GEO rewards definitional, structured, citation-rich content. SEO rewards traditional indexing signals. Optimizing only for one leaves the other two on the table. Every reSpace post passes all three or it does not ship.

08

Brand Compliance Scorecard

Final compliance run on all 4 posts. Audit performed April 29, 2026.

CRITERION	POST 1	POST 2	POST 3	POST 4
Em dashes (must be 0)	0	0	0	0
"reSpace" capitalization correct	PASS	PASS	PASS	PASS
Banned terms in self-description	0	0	0	0
Wet bar used (not "kitchen" for suite)	PASS	PASS	PASS	PASS
"Membership interest" used (not deed)	PASS	PASS	PASS	PASS
"Co-homeownership" (self-description)	PASS	PASS	PASS	PASS
Disclaimer present (body + footer)	PASS	PASS	PASS	PASS
Phone CTA hits (target 4)	4	4	4	4
Outbound authoritative links	6	5	5	4
Brand colors only (navy/coral/sand)	PASS	PASS	PASS	PASS
Clash Display + DM Sans only	PASS	PASS	PASS	PASS
Ghost "re" element on hero	PASS	PASS	PASS	PASS
FAQPage JSON-LD valid	PASS	PASS	PASS	PASS
Word count target	1,360	1,408	1,355	1,721

All 4 posts pass v1.5 brand compliance.

09

Google Search Console Submission Protocol

After each post goes live on respace.co, submit it directly to Google Search Console for accelerated indexing. The protocol below takes about 4 minutes per post and is run by Mary or Rachael.

01 **Confirm the post is live.**

Visit the published URL in an incognito window. Check the page renders, the JSON-LD blocks are in the head, the phone link tel:+12062226322 fires the dial prompt, and the canonical URL matches the live URL.

02 **Validate schema.**

Run the URL through Google's Rich Results Test at *search.google.com/test/rich-results*. Confirm Article (or NewsArticle), FAQPage, and BreadcrumbList all parse with no errors. For Post 4, also confirm HowTo parses. If errors appear, fix and republish before submission.

03 **Open Google Search Console.**

Navigate to the respace.co property at *search.google.com/search-console*. Confirm the property is verified.

04 **Run URL Inspection.**

Paste the new post's full URL into the top inspection bar. GSC will return current indexing status. New posts will return "URL is not on Google."

05 **Click "Test Live URL."**

Wait for GSC to crawl the live page (30 to 90 seconds). Confirm: page is indexable, mobile-usable, structured data is detected, and there are no crawl errors.

06 **Click "Request Indexing."**

GSC adds the URL to the priority crawl queue. Indexing typically completes in hours rather than days. The daily request quota is around 10 to 12 URLs per property; with 4 posts in the series, we are well within limits.

07 **Update the sitemap.**

Confirm respace.co/sitemap.xml includes the new post. If the site uses a static or auto-generated sitemap, trigger a rebuild. Resubmit the sitemap in GSC under Sitemaps if more than one URL was added in a session.

08 **Monitor the next 7 days.**

Check GSC daily for the first week post-publish. Watch for: indexing confirmation, impressions, clicks, average position. If a post does not index within 5 days, re-run URL Inspection and resubmit. Persistent non-indexing usually points to a duplicate-content or low-quality signal that should be flagged to Rachael.

Bing Webmaster Tools (parallel submission)

Bing powers approximately 8% of U.S. search and is the source for ChatGPT's default search index. Submit each new post to Bing Webmaster Tools at *bing.com/webmasters* using the same URL Inspection / Submit URL flow. Bing's daily quota is 10 URLs per session and 50 per day, well within the series volume.

> **Pro tip.** Submit Post 1 (the Realtor.com tie-in) to Bing within the first hour of publishing. Bing's news indexer is faster than Google's for branded news content, and a fast Bing index means faster pickup in ChatGPT and Copilot search results.

10

Performance KPIs & Reporting Cadence

What we measure, when we measure it, and what success looks like for this series.

Tier 1 KPIs (track weekly)

METRIC	SOURCE	TARGET BY DAY 30
Organic impressions on series posts	Google Search Console	10,000+ combined
Organic clicks on series posts	Google Search Console	400+ combined
Average position (head terms)	Google Search Console	Top 20 within 30 days
Phone calls to (206) 222-6322	Call tracking + reSpace dashboard	20+ direct from blog UTM
Waitlist submissions tagged "blog"	respace.co waitlist tracker	40+ direct from blog UTM

Tier 2 KPIs (track monthly)

METRIC	SOURCE	TARGET BY DAY 60
Featured snippets won	Manual SERP check	1+ on cohousing or co-living comparison
People Also Ask captures	Manual SERP check	3+ across the series
Generative engine citations	Manual ChatGPT / Perplexity / Copilot probes	1+ post cited by name
Backlinks earned to series posts	Ahrefs or free Backlink monitor	5+ unique referring domains
Organic time on page	GA4	3:00+ average

Reporting cadence

- **Daily (Days 1 to 7):** Mary checks GSC URL Inspection on each new post for indexing status.

- **Weekly (Days 8 to 30):** Rachael pulls a single-page report of impressions, clicks, top queries, and average position. Sent to Katrina every Friday at 4 PM PT.
- **Monthly (Day 30, Day 60, Day 90):** Full performance review including Tier 2 KPIs. Surface 1 to 3 optimization recommendations per cycle.

What we will do at Day 30 and Day 60

- **Day 30 review.** Identify the highest-impression post and refresh it: add 1 to 2 new sections answering the queries the post is already ranking for. Refresh the dateModified field. Resubmit to GSC.
- **Day 60 expansion.** Identify the post with the most assisted phone calls and waitlist sign-ups. Build a follow-up companion post that goes deeper on the same query family (for example, a follow-up to Post 4 on tax implications of co-buying or on financing scenarios).

> **The bigger play.** This series is the start of an evergreen library, not a campaign. Every post we publish in May becomes a permanent asset. The cohousing and co-living posts in particular will compound for years because the search demand for those terms is not slowing down. We are claiming the language frame around co-homeownership while the category is still being defined.

Own the keywords. Own the conversation. Own the neighborhood.

reSpace

END OF DOCUMENT

Own the neighborhood.

Co-homeownership for people who refuse to rent their whole lives.
